Dutch – A2

## Summary

I am an 22 years old Indonesian studying in the Netherlands. I am currently getting my bachelor degree for UXD at the Hague University of Applied Science. Before studying in the Netherland, I already finished my bachelor studies in Economics in Indonesia where I took Economic Development as my major. I am confident that with my combined knowledge I can solve economic or business issues based on the consumer's view or with an UXD approach.

## Skill Highlights

- Researching
- Statistic Analysis
- Complex problem solver
- Designing
- Empathizing
- Prototyping
- Digital Drawing
- Photography
- Photoshop
- Adobe XD

## Experience

**Assistant Researcher** – For my lecturer's Project on Tourism in Bali (2018)

Me and other colleges help my lecturer's project incorporate with the local government of tourism, helping to interview some people such as business owner i.e. tourist agency, hotel, restaurant owner which concerns the development and preservation of Balinese culture in tourism.

**Freelancer for Events in Bali** – as photographer and logistic expert. Beside my study, I also took some side job as a freelancer, mostly for events like concert, music festival, or even conference. Some time I worked as photographer in certain events and sometime I worked in logistic. Working as freelancer, I noticed how much connection took a big role in order to get to work for the events. A bigger connection you have, the bigger you had a chance and you would get recalled it for another events. I often got so much offered but since I was still studying, I only took 1 or 2 events every month.
